10. BLOG & NEWS

When we think about browsing the internet, we often ignore the browser itself. Instead, we think about all the things we do online—the articles we read, the emails we send, the shows we watch. The software that enables it all, the browser, is so ubiquitous that it's ignored.

Despite the ways our internet use has evolved, the browser has remained relatively unchanged. While all of our other software tools are changing for the better—with more collaborative features, flexible interfaces, and powerful functionality—the browser largely still does what it did twenty-five years ago. What's more, we blame ourselves for the browser's shortcomings. When our browser has an overwhelming number of tabs, we call ourselves inefficient; when we get distracted online, we tell ourselves we need more discipline; when we can't find a url, we think we're disorganized. Why does the browser get a free pass?

That's why we're building a new browser, which we call Arc, because we believe browsers can do so much more to empower us. We're imagining a browser that can think as quickly as we do, take work off of our plates, and pull our creativity forward. A browser equipped for the way we use the internet in 2024, and foundational for how we hope to use it in the future.

Our Team

We're a team of founders who sold their last company, ex-Instagram engineers, former Heads of Design at Tesla and Medium, multiple Google Chrome alums, alumni from Snap, Slack and Pinterest, and so many other people who have done it before.

Our team is also bigger than this piece of paper, so a special thanks for all those who can't fit inside this page.

DISCOVER

The Arc Browser

Arc doesn't just meet your needs , it anticipates them !

Clean and calm, Arc shapes itself to how you use the internet. Effortlessly organize everything you do online — work, study, hobbies — all in one window with Spaces and Profiles. Find your perfect setup with Split View, Themes, and more. Additionally, Arc is built from the ground up to be private and secure. We don't know what sites you visit or what you search for.

Available on : macOS, iOS, Windows 11 & Android

Spaces

Incognito mode

Tidy Tab Titles

Dev mode

Slide View

ChatGPT

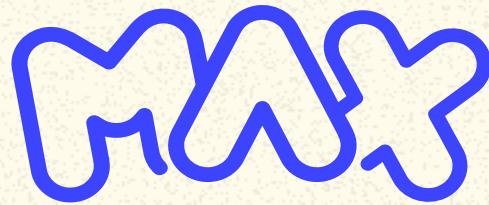

Profiles

Ask On Page

Tidy Downloads

5s preview

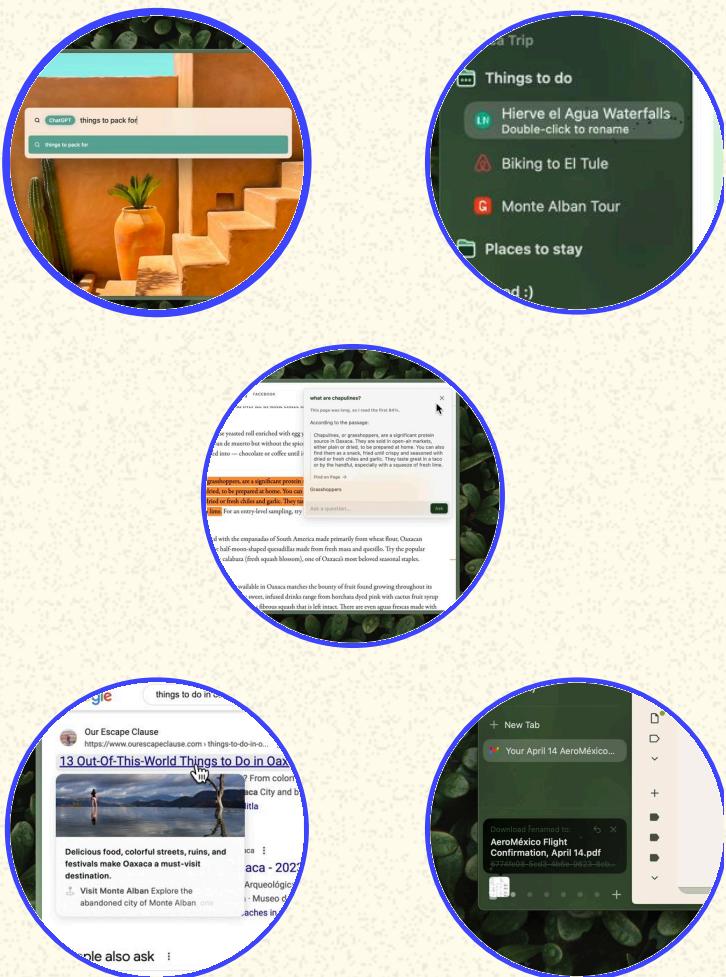

Portrait mode

POWER UP YOUR BROWSING WITH AI. LET ARC DO MORE FOR YOU, SO YOU CAN DO LESS.

MAX is an innovative suite of AI-powered features integrated into the ARC browser, designed to enhance and streamline your web browsing experience.

- Ask on page :** Hold down Command + F on any page to ask a question and let Max answer it for you in seconds.
- 5s preview :** Hover and press shift over any link to generate a preview of the webpage, without a single click.
- Ask GPT :** Start typing “ChatGPT” into the Command Bar, hit Tab, and get answers to your questions in fewer clicks.
- Tidy Tab Titles :** Have your tabs automatically renamed with tidier, shorter titles when you Pin them. Turn down service for your sidebar.
- Tidy Downloads :** Keep your many files more organized with smartly renamed downloads — and make them easier to find later.

BUT WHAT ABOUT CONFIDENTIALITY ?

MAX is designed to be non-intrusive, focusing on subtly improving your browsing experience without overwhelming you with excessive AI suggestions. Currently, it's available for both macOS and Windows.

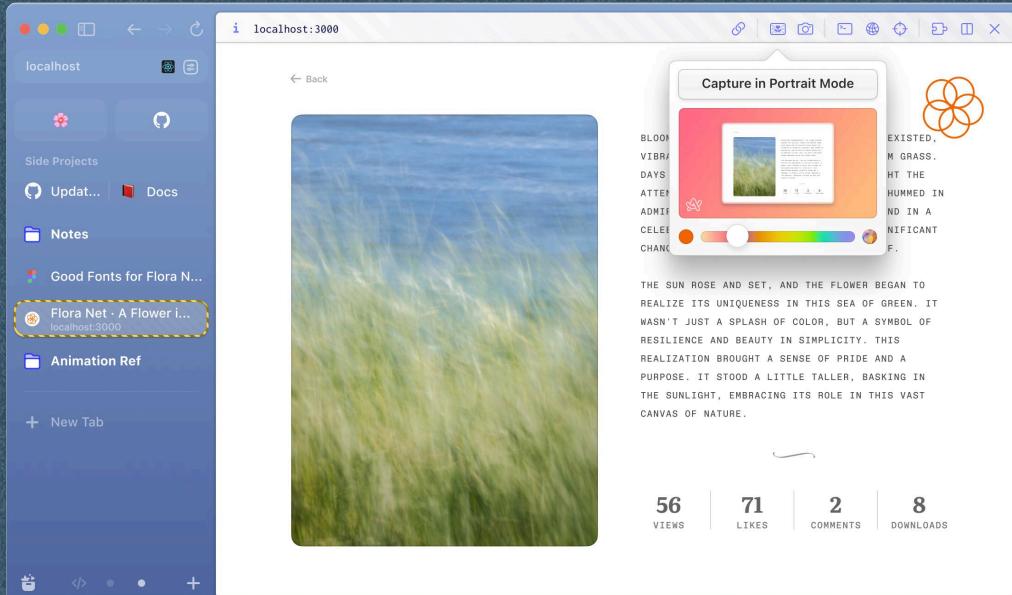

Arc for { DEVELOPPERS }

ARC GIVE YOU THE TOOLS SO YOU CAN FOCUS ON THE DEV SIDE OF YOUR PROJECT.

Arc is design specifically for developers, by developers, making it an excellent tool for those in the field. Here's why :

- Switch between accounts in one click** : Easily switch between test accounts using Profiles and Spaces, with different histories, passwords, and browsing data.
- Advanced Tab Management** : The browser uses a sidebar to organize tabs and favorites, which makes navigation intuitive and reduces distractions. Features like auto-clean up help manage tab overload by closing inactive tabs automatically after a set period.

- Integrated Developer Tools** : Arc integrates essential developer tools directly into the browser.
- Performance Optimization** : Arc is designed to be lightweight and efficient, often using less RAM and CPU compared to other popular browsers like Chrome.
- Enhanced User Interface** : Arc's minimalistic and clean user interface helps developers stay focused on their work. The small navigation bar and the ability to open new tabs without cluttering the workspace contribute to a streamlined browsing experience.
- Shortcut and Command** : Arc provides numberless key shortcuts that make navigating and managing tasks quick, easy and efficient.

By addressing the specific needs and workflows of developers, Arc offers a robust, efficient, and user-friendly browsing experience that enhances productivity and simplifies the complexities of web development.

Arc Search

Find it, faster !

Arc Search is a state-of-the-art mobile browser that emphasizes speed, privacy, and a user-friendly interface. Developed with modern technology, it aims to provide a seamless and efficient browsing experience on mobile devices.

Browse for Me

Ask your question and Arc will dig the entire internet and create a website to summarize the best answer possible.

Pinch to sum'

When on a website, pinch it to get a quick and clear summarize without ad or any distractions.

Sync Across Devices

Users can sync their tabs, and settings across multiple devices, ensuring a consistent experience.

Incognito mode

Get always-on privacy with incognito mode, secure tabs and Data protection.

Goodbye ads

Arc Search integrates an ad-blocker, a pop-up blocker and an hide cookie banner feature.

Voice Search

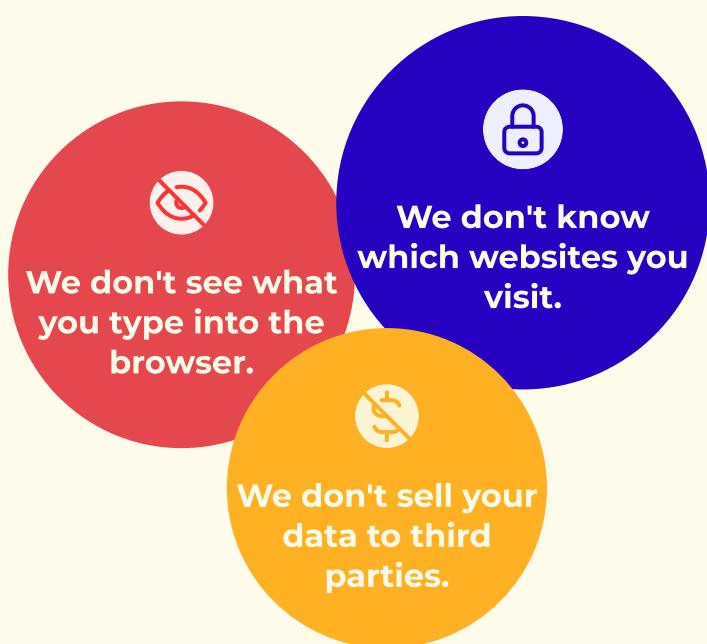

long press the + button or just bring your phone to your ear to trigger Voice search, and ask your question just like on a phone call !

SECURITY

Security and confidentiality

We love the internet, but we don't love when internet companies prioritize profit over privacy. That's why we built a **browser to make the internet better, not make money off your personal data.**

WITCH DATA WE COLLECT

Profile or Contact Data such as email, name, account password so you can log in,

Device Data such as the type of device and the operating system to understand the range of devices our software should support and prevent for software issues.

Product Usage Data such as how often you use various product features to understand feature usage and improve our product

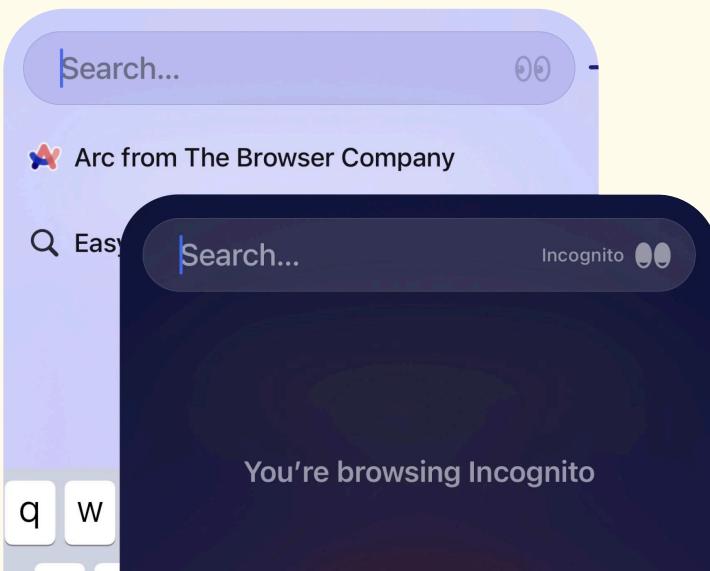

WHY DO WE COLLECT DATA

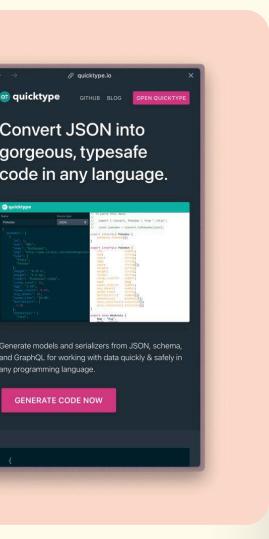

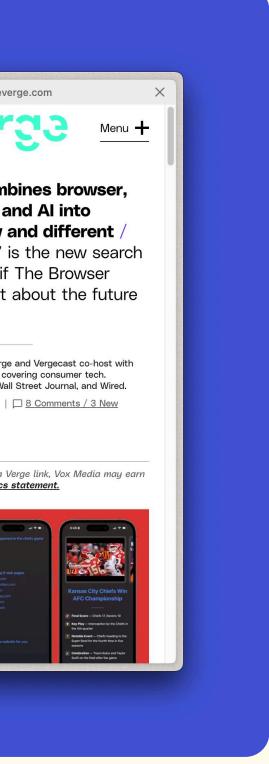

In general, we collect the minimum personal data to provide and improve our product and Services :

- Protect against fraud, or implement additional security measures.
- Correspond with you if you reach out with a support request. We may also send you updates, or other marketing communications.
- Meet legal requirements, safety measures, and enforce legal rights.

HOW DO WE STORE DATA

We do our best to protect the Personal Data. That's why we build in an ads-blocker, a pop-up blocker and an hide cookie banner feature, but it's important to remember that no method of transmitting data over the internet or storing data is 100% secure.

Stay in touch !

As part of our transparency with you, we use several way to keep track with you on the updates and news around our products.
